Surfacing Options

Playground surfacing, whether wood or rubber mulch, sand, or other material, is used in playgrounds for impact attenuation. It provides cushioning to reduce the risk of injury from falls and can also help with drainage and maintenance.

Recycled Rubber Mulch

- Phenomenal shock absorbcency
- Reduced risk of playground injuries
- Minimal maintenance
- Dries quickly after rain
- Will not decompose
- Will not fade
- Non-staining
- Non-toxic
- Does not freeze
- 99.9% steel free
- Available in multiple colors

Wood Mulch

For a traditional play area, we also offer wood mulch. It is a natural product and is easy to replace as it bio-degrades. Wood mulch is the most cost-effective playground surfacing we offer.

Beuta Landscaping Edging

Flexible plastic edging that mimics natural stone. (edging pictured left, above and below)

COBBLESTONE SANDSTONE GRAYSTONE

Weed Guard

Keep the weeds outside of your play area with our landscaping screen! Our weed guard comes in wide rolls and can be cut to the desired length of your playground site.
